Election/Restrictions

This application contains claim groups directed to the following patentably distinct species of the claimed invention:

Group	Invention
I.	Claims 1-10, 19-26, and 27-34, drawn to interconnect model not a lumped capacitance model, calculating an effective capacitance of the interconnect model to be inversely proportional to a voltage at the driving point node of the interconnect model.
II.	Claims 11-16 and 36, drawn to scaling first/second capacitances by ratio(s) of voltage across the first/second capacitance to a driving point voltage, and summing first and second capacitance
III.	Claims 17-18 drawn to multiplying capacitances, dividing products, and summing product with interconnect model not a lumped capacitance model.
IV.	Claim 35 drawn to reducing an interconnect model to a lumped capacitance model and calculating a effective capacitance by setting a voltage across the effective capacitance equal to a voltage at the driving point node of the interconnect model; and

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of

Art Unit: 2825

the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is advised that cancellation of non-elected claims is required.
